PROFILE SUMMARY

Versatile Software Engineer with 4+ years of experience building scalable distributed systems, AI-powered products, and data-intensive platforms. Proven track record across backend, frontend, cloud infrastructure, ML/AI integration, and data engineering — delivering high-impact solutions at companies like GoDaddy, Swiggy, and PeopleStrong. Passionate about system design, code quality, and bridging the gap between engineering and data science.

SKILLS

Languages: Golang, Java, Python, JavaScript, TypeScript, C++, SQL, Bash/Shell, HTML, CSS

Backend & Frameworks: Spring Boot, J2EE, Node.js, Express.js, Hibernate, Flask, FastAPI, REST APIs, GraphQL, gRPC

Frontend & Mobile: React, Next.js, Angular, Tailwind CSS, Material UI, Flutter, Responsive Design, SSR/SSG

AI/ML & Data Science: OpenAI API, LangChain, Prompt Engineering, NLP, Scikit-learn, Pandas, NumPy, TensorFlow, Hugging Face, RAG Pipelines, LLM Fine-tuning

Data Engineering: Apache Kafka, Databricks, Apache Spark, ETL/ELT Pipelines, Data Modeling, Airflow, Stream Processing

Cloud & DevOps: AWS (Lambda, ECS, S3, DynamoDB, Textract, CloudWatch, SQS, SNS), Docker, Kubernetes, Terraform, CI/CD (GitHub Actions), Infrastructure as Code

Databases: DynamoDB, MySQL, PostgreSQL, Redis, MariaDB, SQL Server, MongoDB, Elasticsearch, Apache SOLR, Neo4j

Architecture & Design: Microservices, Event-Driven Architecture, Distributed Systems, System Design, Design Patterns, Multi-Threading, Domain-Driven Design, CQRS

AI Developer Tools: Cursor IDE, Claude Code, GitHub Copilot, ChatGPT, Agentic Coding, AI-Assisted Code Review, Vibe Coding

Tools & Practices: Git, Code Review, Agile/Scrum, Prometheus, Grafana, Kibana, JIRA, Confluence, SonarQube, Load Testing, Technical Documentation

EXPERIENCE

Software Development Engineer 2

Apr 2026 – Present

GoDaddy

Pune, India

- Working on large-scale domain marketplace and auction systems, contributing to backend services handling search, listing, and lifecycle management of domains.
- Designing and developing scalable microservices to support domain auctions, bidding workflows, and real-time updates.
- Collaborating with cross-functional teams to improve system performance, reliability, and user experience across domain discovery and purchasing flows.
- Optimizing APIs and backend services for high throughput and low latency in search and auction-related operations.

Software Engineer 1

Jan 2025 – April 2026

Swiggy (Instamart Ads)

Remote, India

- Led the end-to-end development of RO Automation for Instamart Ads, enabling advertisers to upload RO PDFs that are processed via AWS Lambda with Textract and stored into DynamoDB.
- Developed a scheduled cron job in Post-Serving to monitor budget consumption by querying adv-metrics in DynamoDB and comparing it against RO limits.
- Implemented Kafka-based event publishing when RO budgets are breached, triggering automated downstream alerts.
- Developed the backend for the new Pre-Search Page Ads feature in Instamart, **driving a revenue uplift of 1 Cr within just 5 days of launch during a sale.**
- Enhanced Databricks-based Ads Reporting pipeline by introducing dynamic dimension mapping logic, reducing payload complexity and improving flexibility for new report types.
- Integrated Prometheus metrics for monitoring cron execution stats, Kafka delivery health, and alerting on anomalies.

Software Engineer 2

Dec 2023 – Dec 2024

PeopleStrong Technologies

Gurugram, India

- Architected and delivered a secure, WhatsApp-based onboarding solution, **reducing administrative burden by 20%** and improving candidate satisfaction by 30%.
- Implemented Long Polling for real-time signing status updates, ensuring a smooth user experience.

- Mentored and led a team of three SDE1s to design and develop a Scheduler for continuously pushing candidate/applicant data from MySQL to Apache SOLR, achieving fast data retrieval in full-text searching.
- Designed and implemented a rate-limiting feature for One-Time Passwords (OTP) during login, enhancing security protocols which **decreased unauthorized access attempts by 50%** and improved user trust in the system.
- Managed transition from MySQL to MariaDB, overcoming challenges for a seamless migration. Improved user experience for clients using the New Onboarding and Candidate Portal.
- Directed a log capturing, metrics, and alert mechanism to store and provide insights on all communications to users and third-party APIs, **reducing incident count by 50 per month**.

Software Engineer 1

Jan 2022 – Nov 2023

PeopleStrong Technologies

Gurugram, India

- Resolved outstanding security issues by validating the checksum of request and response payloads of URIs at the server level, ensuring data integrity for over 1500 APIs.
- Designed a solution for Naukri Job Posting/Applicant fetching integration to streamline candidate sourcing, **contributing 2% of the total product revenue**.
- Clinched **3rd place in the Gen AI Hackathon** by crafting a custom search bar using the ChatGPT API, and made a custom algorithm that achieved an 85% accuracy rate in extracting candidate data from the organization's pool.

PROJECTS

MyFinance | *React, Next.js, Node.js, OpenAI API, Google OAuth* | my-finance-1712.vercel.app

2024

- Built a full-stack AI-powered personal finance management web application featuring an AI Financial Advisor, transaction tracking with import support, net worth analysis, and cash flow forecasting.
- Implemented modules for investment tracking, insurance and EMI reminders, tax summary, financial health scoring, and goal planning — all secured with Google OAuth and bank-grade encryption.

Samay Innovation | *React, Next.js, Vercel* | samayinnovation.com

2024

- Developed the complete digital presence for an award-winning luxury interior design studio with 1000+ completed projects and international clientele across India and the USA.
- Built a dynamic project portfolio with category browsing, Instagram feed integration, service showcase, and client inquiry flow — optimized for performance and mobile-first experience.

Raju Pathak Photography | *React, Next.js, Vercel* | raju-pathak-photography.vercel.app

2024

- Designed and developed a premium personal brand website for a photography director with 30+ years of experience and clients including Mont Blanc, served across 15+ countries.
- Implemented an auto-scrolling multi-category portfolio, storytelling layout, masterclass and consultation sections, and global-audience-ready design with strong trust signal architecture.

KéNailé | *React, Next.js, Vercel* | kenaile-frontend.vercel.app

2024

- Built a full brand website and online booking system for a home-based beauty studio, transforming a local service into a bookable digital business with home-delivery capability.
- Delivered mobile-first UI with a service catalog, slot booking flow, customer testimonials, and delivery proposition — resulting in a complete end-to-end customer acquisition funnel.

EDUCATION

Dhirubhai Ambani Institute of Information and Communication Technology

July 2018 – May 2022

B.Tech in Information and Communication Technology; CGPA: 7.00/10

Gandhinagar, Gujarat
